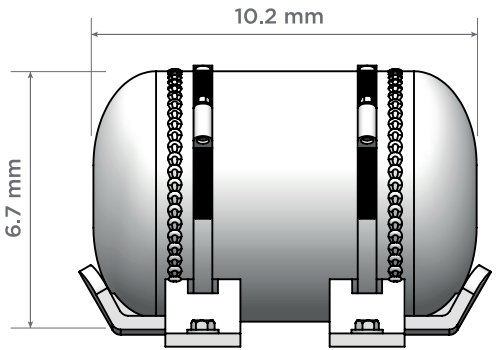
DCL-PAR123
Instructions

Paints required:

- BLACK (N5-X011 by Number Five)
- TRAFFIC RED RAL3020 (N5-X037 by Number Five)
- STEEL (N5-C054 by Number Five)
- COPPER GOLD (N5-X096 by Number Five)



NOTE:

3D resin is fragile, so you should NOT use excessive force when removing the supports or joining the pieces or you risk breaking the parts.
Carry out a test assembly before painting the parts, sanding where necessary and preferably the plastic parts of the kit, until the parts fit together with light pressure without being forced.

Instructions

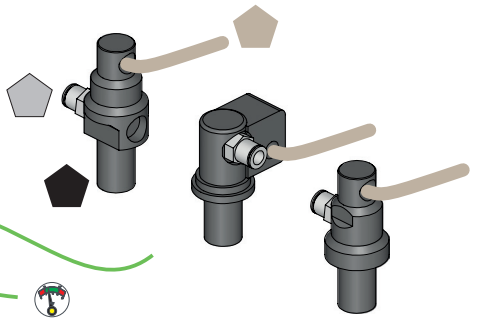
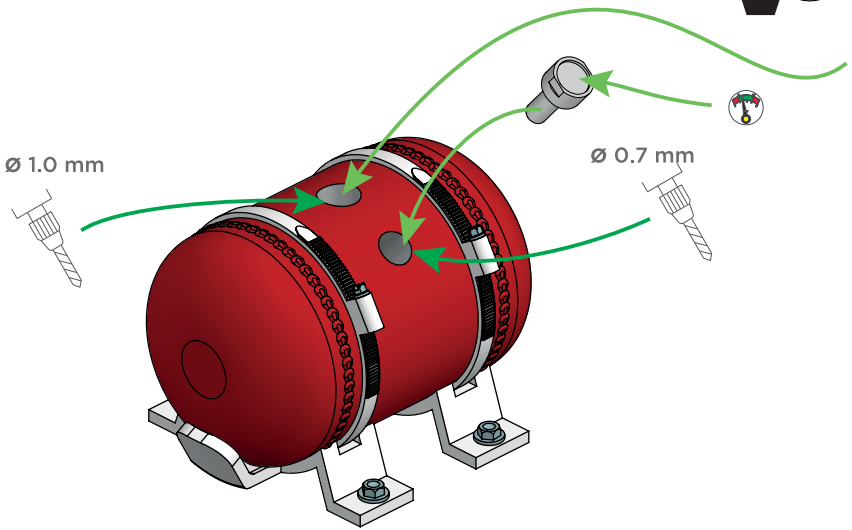
Fire extinguisher with automatic activation system

In the position required according to the extinguishing system to be reproduced, drill a 1.0mm hole to install the activation valve and a 0.7mm hole to install the pressure gauge.





Select one of the three activation valve models supplied and install, in the indicated position, a quick connector and a section of 0.3mm diameter wire to simulate the control wiring of the extinguishing system.
