Muffler

Before painting

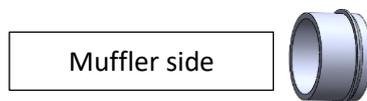

Temporary place brackets on the muffler to smooth surface and to remove internal supports.

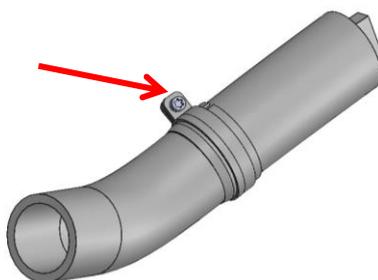

Installation:

1. Install brackets (12), (13) on the muffler (3) and fix them with rivets (15).
2. Put on muffler end tip (1).
3. Add main pipe connecting element (4) NOT DIRECTION.

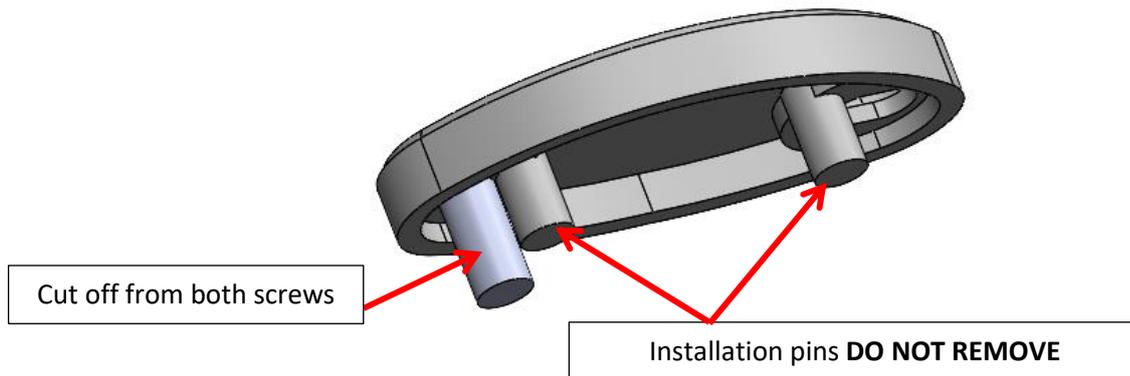

4. Add screw (14) to the main pipe (2).

5. Push main pipe into the muffler DO NOT CEMENT
6. Connect main pipe with J3
7. Install main pipe cover connector (6) into G5 and install to cover.
8. Add screw (11) to V2-2. Installation hole 1.0mm.

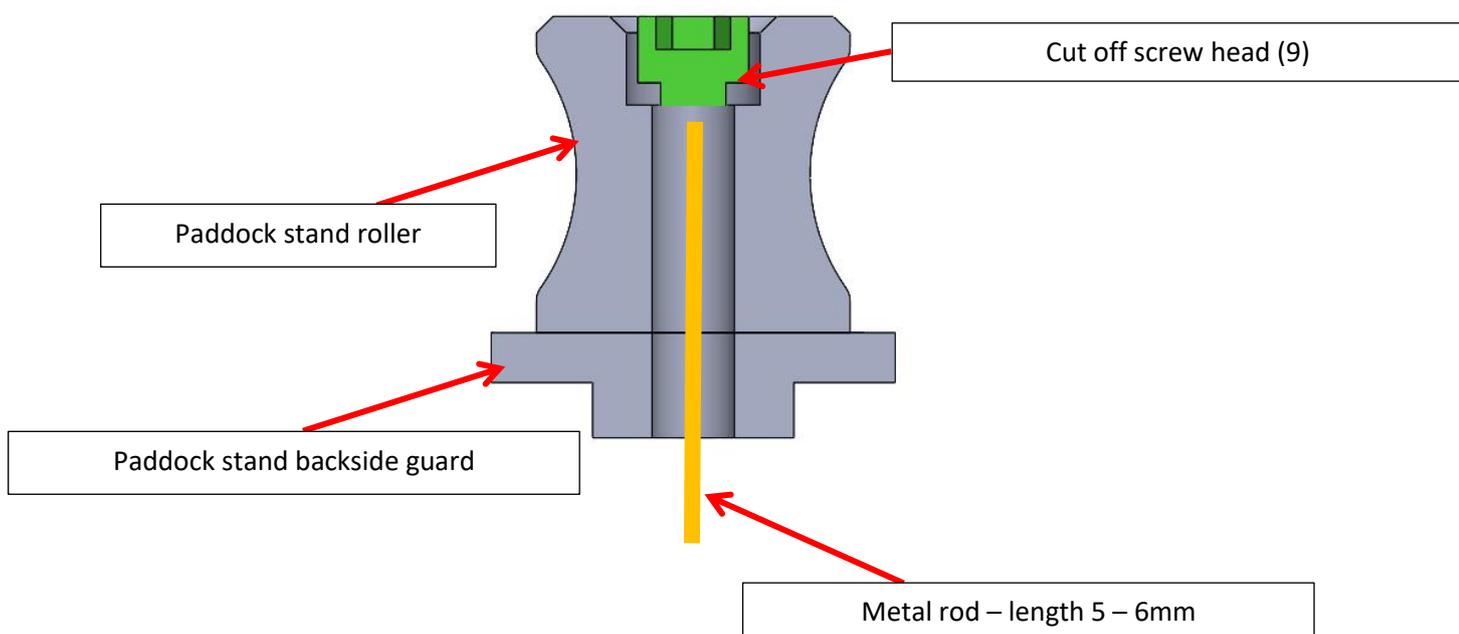

Mirror covers

1. Install screws (8) into mirror covers (5).
2. Cut off excess pins from screws to make the bottom even.

Paddock stand pads

Assemble as shows and install in the swingarm.
