Donnie Allison won ten times during his racing career, which spanned the 1960s, 1970s and early 1980s. He was part of the "Alabama Gang" and is the brother of 1983 champion Bobby Allison and uncle of Davey Allison and Clifford Allison. He was inducted in the International Motorsports Hall of Fame in 2009.

Allison possibly is most remembered for his involvement in a final-lap crash and a subsequent fist-fight with Cale Yarborough in the 1979 race. He was leading the race on the final lap with Yarborough drafting him tightly. As Yarborough attempted his signature slingshot pass at the end of the backstretch, Allison attempted to block him, but Yarborough refused to give ground. As he pulled alongside Allison, his left side tires left the pavement and went into the wet and muddy infield grass. Yarborough's car resultingly started losing control and contacted Allison's halfway down the backstretch. As both drivers tried to regain control, their cars made contact several times and finally locked together and crashed into the outside wall in turn 3. After the cars settled in the grass, Allison and Yarborough started to argue. After they had talked it out, Bobby Allison, who was lapped at that point, pulled over and began to defend his brother, but a fist-fight broke out. It all happened on the first nationally televised race. Richard Petty, who was over half a lap behind at the time of the crash, went on to win the race. The fight made headlines all across America. The publicity was instrumental in the growth of stock car racing.
